

SCENARIO FOR ACTIVITY 3: LOGIC MODEL

Older Drivers

Drivers over the age of 55 are invited to participate in an informal drop-in event organised by RSO's that includes various presentations by experts that encourage drivers to consider brushing up their skills and take account of today's driving styles. The event is free and no pre-booking is required, although it is recommended. The event will include advice about journey planning and the effects on driving of some medications.

There is an offer to take a free refresher skills course at a later date. The half day theory session aims to encourage older drivers to renew their confidence on the roads in a supportive and friendly environment. The event will be repeated several times at different locations across the authority.

This scenario is based on real interventions posted on Road Safety GB.
