Title:
AIM(S):

OBJECTIVES		INPUTS		OUTPUTS		OUTCOMES	
						SHORT TERM	LONG TERM
	➔				➔		

Inputs are the resources for your project i.e. your costs. **Outputs** are the actual work you do with those resources – the service and/or products that you develop and deliver. **Outcomes** are the results of that work and can be short-term (immediate changes) or long-term (changes that happen after a period of time).

External Factors (outside of your control) that may affect success of the intervention:

Assumptions (your beliefs about how the intervention outputs will cause the intended outcomes)
